

ENGINE CONTROLS

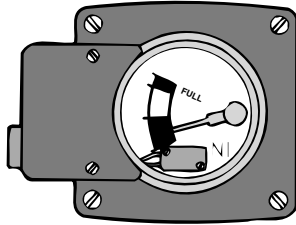

Lube Level Switch Gauges

- Sight gauge with adjustable high-low contacts.
- Large 6-3/4" sight glass.
- Can be wired into nerve center to protect engines and pumps.
- Recommended for engines with large crankcase capacity.

NI Part #	Description
59009	Gauge, Sight, high-low contact

Lube Level Maintainers

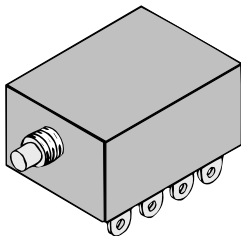

NI Part #	Description
59010	Gauge, Lube Level Maintainer

- Automatically maintain proper lube level.
- Use on small- to medium-size engines.
- SPDT snap switch for low level shutdown.

Diesel/Battery Ignition

Magnetic Switches

- 12-24 VDC: opens circuit to run device.
- Disconnects from power after trip.

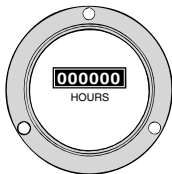

Part #	Description
93688	Switch, Relay, 12 to 24 VDC

Nerve Centers

- Specify 12 or 24 VDC.
- Designed for center pivot irrigation systems with N.C. alignment switches.

NI Part #	Description
93695	Switch, Nerve Center, 12 VDC
93627	Switch, Push-Button Stop

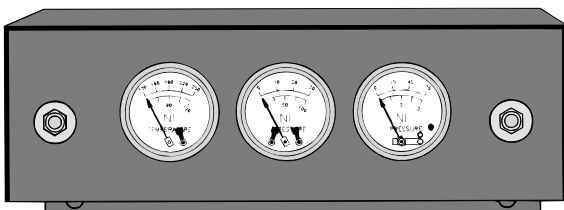

Hour Meters

- Registers to 9,999.9, then re-zeros.
- Rotating indicator shows when unit is running.

NI Part #	Description
78009	Meter, Hour, 4 - 40 VDC

Safety Switch Panels

- Water temperature.
- Oil pressure.
- Pump pressure.
- Magnetic switch.
- Stop switch.

NI Part #	Description
84005	Panel, Switch Gauge, for gas engine
84006	Panel, Switch Gauge, for diesel engine
