

SPRAYS

**Additional Senninger Pivot-Master® Products**

**Quad-Spray® (LEPA)**

*Includes nozzle; specify desired size.*

NI Part #	Description
928223	Complete Quad Spray w/ 6 PSI Regulator
928224	Complete Quad Spray w/ 10 PSI Regulator
92821	Complete Quad Spray less PSI Regulator

**Features and Benefits**

- Developed specifically for Low Energy Precision Application (LEPA).
- Less energy is needed; operating at very low pressures of 6-10 psi at the nozzle and low water requirements of 95-98% applications efficiency.
- Two bubble modes eliminate misting and reduce soil redistribution.
- Spray irrigate mode to wet entire soil surface when needed.
- Chemigate pads available:  
Corn with 58° upward throw and  
Cotton with 15° - 30° multi-level upward throw.
- Standard model includes internal Pressure-Master Regulator.
- Color coded nozzles for easy size identification.

Quad-Sprays are available in complete packages only.  
Quad-Sprays typically are mounted on hose drops for direct furrow irrigation.

*Quad-Spray® in spray irrigate mode.*

*Quad-Spray®*

**F**

**Fan Spray™**

**Features and Benefits**

- Mounted on either side of a tower, the Fan Spray's directional spray helps keep water away from wheel tracks.
- Color coded nozzles for easy size identification.

*Includes nozzle; specify desired size.*

NI Part #	Description
92831	Complete 180° Fan Spray

*Fan Spray*

**Fan spray must be mounted on a rigid drop or on top of pipe. Do not mount on hose drops.**
